Instructions to Authors

General Policy. ANTICANCER RESEARCH (AR) will accept original high quality works and reviews on all aspects of experimental and clinical cancer research. The Editorial Policy advises that priority will be given to papers advancing the understanding of cancer causation, and to papers applying the results of basic research to cancer diagnosis, prognosis and therapy. AR will also accept the following for publication: (a) Abstracts of scientific meetings on cancer, following consideration and approval by the Editorial Board; (b) Announcements of meetings related to cancer research; (c) Short reviews (of approximately 1200 words) and announcements of newly received books and journals related to cancer; and (d) Announcements of awards and prizes.

The principal aim of AR is to provide for the prompt publication of original works of high quality, generally within 1-2 months from final acceptance. Manuscripts will be accepted on the understanding that they report original unpublished works on the cancer problem that are not under consideration for publication by another journal, and that they will not be published again in the same form. All material submitted to AR will be subject to review, when appropriate, by two members of the Editorial Board and by one suitable outside referee. The Editors reserve the right to improve manuscripts regarding grammar and style.

Format. Two types of papers may be submitted: (i) full papers containing completed original work, and (ii) short papers. Additionally, the Editors may invite review articles concerning fields of recognisable progress. Papers should contain all essential data in order to make the presentation clear. Reasonable economy should be exercised with respect to the number of tables and illustrations used. Papers should be written in clear, concise English. Spelling should follow that given in the "Shorter Oxford English Dictionary".

Manuscripts. Submitted manuscripts should not exceed fourteen (14) pages (approximately 250 words per double - spaced typed page), including abstract, text, tables, figures and references (corresponding to 4 printed pages). Papers exceeding four printed pages will be subject to excess page charges. All manuscripts should be divided into the following sections: (a) First page including the title of the presented work [not exceeding fifteen (15) words], full names and full postal addresses of all Authors, name of the Author to whom proofs are to be sent, key words, an abbreviated running title, an indication "clinical", "epidemiological", or "experimental" study, and the date of submission. (Note: The order of the Authors is not necessarily indicative of their contribution to the work. Authors may note their individual contribution(s) in the appropriate section(s) of the presented work); (b) Abstract not exceeding 150 words, organized according to the following headings: Background - Materials and Methods - Results - Conclusion; (c) Introduction; (d) Materials and Methods, or Patients and Methods; (e) Results; (f) Discussion; (g) Acknowledgements, and (h) References. All pages must be numbered consecutively. Footnotes should be avoided. Review articles may follow a different style according to the subject matter and the Author's opinion. Review articles should not exceed 35 pages (approximately 250 words per double-spaced typed page) including all tables, figures and references.

Figures. All figures (whether photographs or graphs) should be clear, high contrast, glossy prints of the size they are to appear in the journal: 8.00 cm (3.15 in.) wide for a single column; 17.00 cm (6.70 in.) for a double column; maximum height: 20.00 cm (7.87 in.). Graphs must be submitted as photographs made from drawings and must not require any artwork, typesetting, or size modifications. Symbols, numbering and lettering should be clearly legible. The number and top of each figure must be indicated on the reverse side. Original karyotypes and photographs should be provided wherever possible, rather than photographic copies. A charge will be made for a colour plate.

Tables. Each table should be submitted on a separate page, typed double-spaced. Tables should be numbered with Roman numerals and should include a short title.

Nomenclature and Abbreviations. Nomenclature should follow that given in «Chemical Abstracts». Standard abbreviations are preferable. If a new abbreviation is used, it must be defined at its first usage.

References. Citations for the reference sections of submitted works should follow the standard form of «Index Medicus» and must be numbered consecutively. In the text, references should be cited by number. Examples: 1 Sumner AT: The nature of chromosome bands and their significance for cancer research. *Anticancer Res 1:* 205-216,1981. 2 McGuire WL and Chamness GC: Studies on the oestrogen receptor in breast cancer. *In: Receptors for Reproductive Hormones* (O' Malley BW and Chamnes GC, eds). New York, Plenum Publ Corp. 1973, pp 113-136.

Submission of Manuscripts. An original and two copies of the manuscript (including all photographs and graphs) should be sent to: Dr. J. G. Delinassios, Managing Editor, Anticancer Research, Editorial Office, International Institute of Anticancer Research, 1st km Kapandritiou-Kalamou Rd., Kapandriti, P.O.Box 22, Attiki 19014, Greece. A floppy disc should also be submitted indicating the computer-processing program using the text form ASCII FILE. Authors are invited to submit along with their manuscripts a short list of possible reviewers and any previous publications which could facilitate reviewing. Manuscripts should be accompanied by six adhesive labels with the name and address of the Author to whom correspondence should be sent. Only the original copy of the submitted manuscript will be returned to Authors upon rejection. The number of recently accepted manuscripts will be entered in the Anticancer Research page "Author's Service" as soon as a decision has been reached.

Galley Proofs. Unless otherwise indicated, galley proofs will be sent to the first-named Author of the submission. Corrections of galley proofs should be limited to typographical errors.

Reprints. Twenty-five copies of each communication will be provided free of charge. Additional copies may be ordered after the acceptance of the paper. Requests for additional reprints should be addressed to the Editorial Office.
