

Errata

Volume 31, No. 11, page 3727: Right column, lines 23-29, last paragraph of introduction should read:

The present study, which is part of a larger study performed in the Radiation-Immunobiology Group at the Department of Radiation Oncology of the University Hospital of Erlangen in cooperation with us, investigates the forms and mechanisms of glioblastoma cell death and the role of danger signals, DAMP, in particular of heat-shock protein 70 (HSP70) (11), in a radio-resistant human glioblastoma cell line (U87) after radiation or chemotherapy and combinations of these treatments and in various glioblastoma cell lines. The use of cultured cells may be a good model *in vitro* to mimic the real *in vivo* situation.

Volume 31, No. 11, page 3731: Acknowledgements should be inserted before References:

Acknowledgements

The support of the DAAD for the stay of Francesca Pasi in the laboratory of PD Dr. Udo Gaipl (Radiation Immunobiology, Department of Radiation Oncology, University Hospital Erlangen) is acknowledged.
