

Instructions to Authors 2014

General Policy. ANTICANCER RESEARCH (AR) will accept original high quality works and reviews on all aspects of experimental and clinical cancer research. The Editorial Policy suggests that priority will be given to papers advancing the understanding of cancer causation, and to papers applying the results of basic research to cancer diagnosis, prognosis, and therapy. AR will also accept the following for publication: (a) Abstracts and Proceedings of scientific meetings on cancer, following consideration and approval by the Editorial Board; (b) Announcements of meetings related to cancer research; (c) Short reviews (of approximately 120 words) and announcements of newly received books and journals related to cancer, and (d) Announcements of awards and prizes.

The principal aim of AR is to provide prompt publication (print and online) for original works of high quality, generally within 1-2 months from final acceptance. Manuscripts will be accepted on the understanding that they report original unpublished works on the cancer problem that are not under consideration for publication by another journal, and that they will not be published again in the same form. All authors should sign a submission letter confirming the approval of their article contents. All material submitted to AR will be subject to review, when appropriate, by two members of the Editorial Board and by one suitable outside referee. The Editors reserve the right to improve manuscripts on grammar and style.

The Editors and Publishers of AR accept no responsibility for the contents and opinions expressed by the contributors. Authors should warrant due diligence in the creation and issuance of their work.

NIH Open Access Policy. The journal acknowledges that authors of NIH funded research retain the right to provide a copy of the final manuscript to the NIH four months after publication in ANTICANCER RESEARCH, for public archiving in PubMed Central.

Copyright. Once a manuscript has been published in ANTICANCER RESEARCH, which is a copyrighted publication, the legal ownership of all published parts of the paper has been transferred from the Author(s) to the journal. Material published in the journal may not be reproduced or published elsewhere without the written consent of the Managing Editor or Publisher.

Format. Two types of papers may be submitted: (i) Full papers containing completed original work, and (ii) review articles concerning fields of recognisable progress. Papers should contain all essential data in order to make the presentation clear. Reasonable economy should be exercised with respect to the number of tables and illustrations used. Papers should be written in clear, concise English. Spelling should follow that given in the "Shorter Oxford English Dictionary".

Manuscripts. Submitted manuscripts should not exceed fourteen (14) pages (approximately 250 words per double - spaced typed page), including abstract, text, tables, figures, and references (corresponding to 4 printed pages). Papers exceeding four printed pages will be subject to excess page charges. All manuscripts should be divided into the following sections:

(a) *First page* including the title of the presented work [not exceeding fifteen (15) words], full names and full postal addresses of all Authors, name of the Author to whom proofs are to be sent, key words, an abbreviated running title, an indication "review", "clinical", "epidemiological", or "experimental" study, and the date of submission. (Note: The order of the Authors is not necessarily indicative of their contribution to the work. Authors may note their individual contribution(s) in the appropriate section(s) of the presented work); (b) *Abstract* not exceeding 150 words, organized according to the following headings: Background/Aim - Materials and Methods/Patients and Methods - Results - Conclusion; (c) *Introduction*; (d) *Materials and Methods/Patients and Methods*; (e) *Results*; (f) *Discussion*; (g) *Acknowledgements*; (h) *References*. All pages must be numbered consecutively. Footnotes should be avoided. Review articles may follow a different style according to the subject matter and the Author's opinion. Review articles should not exceed 35 pages (approximately 250 words per double-spaced typed page) including all tables, figures, and references.

Figures. All figures (whether photographs or graphs) should be clear, high contrast, at the size they are to appear in the journal: 8.00 cm (3.15 in.) wide for a single column; 17.00 cm (6.70 in.) for a double column; maximum height: 20.00 cm (7.87 in.). Graphs must be submitted as photographs made from drawings and must not require any artwork, typesetting, or size modifications. Symbols, numbering and lettering should be clearly legible. The number and top of each figure must be indicated. Colour plates are charged.

Tables. Tables should be typed double-spaced on a separate page, numbered with Roman numerals and should include a short title.

References. Authors must assume responsibility for the accuracy of the references used. Citations for the reference sections of submitted works should follow the standard form of "Index Medicus" and must be numbered consecutively. In the text, references should be cited by number. Examples: 1 Sumner AT: The nature of chromosome bands and their significance for cancer research. *Anticancer Res* 1: 205-216, 1981. 2 McGuire WL and Chamnes GC: Studies on the oestrogen receptor in breast cancer. In: *Receptors for Reproductive Hormones* (O' Malley BW, Chamnes GC (eds.). New York, Plenum Publ Corp., pp 113-136, 1973.

Nomenclature and Abbreviations. Nomenclature should follow that given in "Chemical Abstracts", "Index Medicus", "Merck Index", "IUPAC –IUB", "Bergey's Manual of Determinative Bacteriology", The CBE Manual for Authors, Editors and Publishers (6th edition, 1994), and MIAME Standard for Microarray Data. Human gene symbols may be obtained from the HUGO Gene Nomenclature Committee (HGNC) (<http://www.gene.ucl.ac.uk/>). Approved mouse nomenclature may be obtained from <http://www.informatics.jax.org/>. Standard abbreviations are preferable. If a new abbreviation is used, it must be defined on first usage.

Clinical Trials. Authors of manuscripts describing clinical trials should provide the appropriate clinical trial number in the correct format in the text.

For International Standard Randomised Controlled Trials (ISRCTN) Registry (a not-for-profit organization whose registry is administered by Current Controlled Trials Ltd.) the unique number must be provided in this format: ISRCTNXXXXXXXX (where XXXXXXXX represents the unique number, always prefixed by "ISRCTN"). Please note that there is no space between the prefix "ISRCTN" and the number. Example: ISRCTN47956475.

For Clinicaltrials.gov registered trials, the unique number must be provided in this format: NCTXXXXXXXX (where XXXXXXXX represents the unique number, always prefixed by 'NCT'). Please note that there is no space between the prefix 'NCT' and the number. Example: NCT00001789.

Ethical Policies and Standards. ANTICANCER RESEARCH agrees with and follows the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" established by the International Committee of Medical Journal Editors in 1978 and updated in October 2001 (www.icmje.org). Microarray data analysis should comply with the "Minimum Information About Microarray Experiments (MIAME) standard". Specific guidelines are provided at the "Microarray Gene Expression Data Society" (MGED) website. Presentation of genome sequences should follow the guidelines of the NHGRI Policy on Release of Human Genomic Sequence Data. Research involving human beings must adhere to the principles of the Declaration of Helsinki and Title 45, U.S. Code of Federal Regulations, Part 46, Protection of Human Subjects, effective December 13, 2001. Research involving animals must adhere to the Guiding Principles in the Care and Use of Animals approved by the Council of the American Physiological Society. The use of animals in biomedical research should be under the careful supervision of a person adequately trained in this field and the animals must be treated humanely at all times. Research involving the use of human foetuses, foetal tissue, embryos and embryonic cells should adhere to the U.S. Public Law 103-41, effective December 13, 2001.

Submission of Manuscripts. Please follow the Instructions to Authors regarding the format of your manuscript and references. There are 3 ways to submit your article (NOTE: Please use only one of the 3 options. Do not send your article twice.):

1. To submit your article online please visit: IIAR-Submissions (<http://www.iiar-anticancer.org/submissions/login.php>)
2. You can send your article via e-mail to journals@iiar-anticancer.org. Please remember to always indicate the name of the journal you wish to submit your paper. The text should be sent as a Word document (*.doc) attachment. Tables, figures and cover letter can also be sent as e-mail attachments.
3. You can send the manuscript of your article via regular mail in a USB stick, DVD, CD or floppy disk (including text, tables and figures) together with three hard copies to the following address:

John G. Delinasios
 International Institute of Anticancer Research (IIAR)
 Editorial Office of ANTICANCER RESEARCH,
 IN VIVO, CANCER GENOMICS and PROTEOMICS.
 1st km Kapandritiou-Kalamou Road
 P.O. Box 22, GR-19014 Kapandriti, Attiki
 GREECE

Submitted articles will not be returned to Authors upon rejection.

Galley Proofs. Unless otherwise indicated, galley proofs will be sent to the first-named Author of the submission. Corrections of galley proofs should be limited to typographical errors. Reprints, PDF files, and/or Open Access may be ordered after the acceptance of the paper. Requests should be addressed to the Editorial Office.

| Decreased miR-206 Expression in BRCA1 Wild-type Triplenegative Breast Cancer Cells After Concomitant Treatment with Gemcitabine and a Poly(ADP-ribose) Polymerase-1 Inhibitor. A. SASAKI, Y. TSUNODA, M. TSUJI, Y. UDAKA, H. OYAMADA, H. TSUCHIYA, K. OGUCHI (<i>Shinagawa, Tokyo; Kamogawa, Chiba, Japan</i>) | 4893 |
| TKI258, a Multi-tyrosine Kinase Inhibitor Is Efficacious Against Human Infant/Childhood Lymphoblastic Leukemia <i>In Vitro</i> . J. EUCKER, C. ZANG, Y. ZHOU, X. LI, P. HABEL, C.-O. SCHULZ, C. SCHOLZ, H. LIU (<i>Berlin, Germany; Taiyuan, PR China</i>) | 4899 |

| | |
|--|------|
| Neutrophil Expression of ICAM1, CXCR1, and VEGFR1 in Patients with Breast Cancer Before and After Adjuvant Chemotherapy. C. LOHRI, C.S. HUTZLI SCHALTEGGER, M. VAN DEN BROEK, R.H. WENGER, C. RUEGG, D. FINK, M.K. FEHR, A. KNUTH, M. ZWEIFEL (<i>Buelach; Maennedorf; Zurich; Fribourg; Bern, Switzerland; Doha, Qatar</i>) | 4693 |
| Nanotherapy with Hybrid Liposomes for Colorectal Cancer Along with Apoptosis <i>In Vitro</i> and <i>In Vivo</i> . H. ICHIHARA, S. NAKAGAWA, Y. MATSUOKA, K. YOSHIDA, Y. MATSUMOTO, R. UEOKA (<i>Kumamoto, Japan</i>) | 4701 |
| Effect of Light Irradiation by Light Emitting Diode on Colon Cancer Cells. N. MATSUMOTO, K. YOSHIKAWA, M. SHIMADA, N. KURITA, H. SATO, T. IWATA, J. HIGASHIJIMA, M. CHIKAKIYO, M. NISHI, H. KASHIHARA, C. TAKASU, S. ETO, A. TAKAHASHI, M. AKUTAGAWA, T. EMOTO (<i>Tokushima, Japan</i>) | 4709 |
| PAX3 Loads onto Pericentromeric Heterochromatin During S Phase Through PARP1. T.-F. WU, Y.-L. YAO, I.-L. LAI, T.-H. LEE, D.A. UNDERHILL, W.-M. YANG (<i>Taichung, Taiwan, ROC; Edmonton, AB, Canada</i>) | 4717 |
| Requirement of JNK Signaling for Self-renewal and Tumor-initiating Capacity of Ovarian Cancer Stem Cells. M. SEINO, M. OKADA, K. SHIBUYA, S. SEINO, S. SUZUKI, T. OHTA, H. KURACHI, C. KITANAKA (<i>Yamagata; Tokyo; Osaka, Japan</i>) | 4723 |
| Liposomes Ameliorate Crizotinib- and Nilotinib-induced Inhibition of the Cardiac I _{Kr} Channel and QTc Prolongation. G.M. SHOPP, L. HELSON, A. BOUCHARD, D. SALVAIL, M. MAJEED (<i>Boulder, CO; Quakertown, PA; East Windsor, NJ, USA; Sherbrooke, QC, Canada</i>) | 4733 |
| Serum EpCAM Expression in Pancreatic Cancer. F. GEBAUER, L. STRUCK, M. TACHEZY, Y. VASHIST, D. WICKLEIN, U. SCHUMACHER, J.R. IZBICKI, M. BOCKHORN (<i>Hamburg, Germany</i>) | 4741 |
| Development of a Novel <i>In Vivo</i> Cancer Model Using Cell Sheet Engineering. R. SUZUKI, A. ARUGA, H. KOBAYASHI, M. YAMATO, M. YAMAMOTO (<i>Tokyo, Japan</i>) | 4747 |
| LLW-3-6 and Celecoxib Impacts Growth in Prostate Cancer Cells and Subcellular Localization of COX-2. T. YEROKUN, L.L. WINFIELD (<i>Atlanta, GA, USA</i>) | 4755 |
| Insight into the Effect of the Vasopressin Analog Desmopressin on Lung Colonization by Mammary Carcinoma Cells in BALB/c Mice. J. GARONA, M. PIFANO, A.M. SCURSONI, D.E. GOMEZ, D.F. ALONSO, G.V. RIPOLL (<i>Buenos Aires, Argentina</i>) | 4761 |
| Expression of ABCB6 Is Related to Resistance to 5-FU, SN-38 and Vincristine. K. MINAMI, Y. KAMIJO, Y. NISHIZAWA, S. TABATA, F. HORIKUCHI, M. YAMAMOTO, K. KAWAHARA, Y. SHINSATO, T. TACHIWADA, Z.-S. CHEN, K. TSUJIKAWA, M. NAKAGAWA, N. SEKI, S.-I. AKIYAMA, K. ARIMA, Y. TAKEDA, T. FURUKAWA (<i>Kagoshima; Yamagata; Osaka; Chiba; Fukuoka, Japan; Queens, NY, USA</i>) | 4767 |
| Erythrocyte Membrane Fatty Acids Profile in Colorectal Cancer Patients: A Preliminary Study. G. COVIELLO, V. TUTINO, M. NOTARNICOLA, M.G. CARUSO (<i>Castellana Grotte, Italy</i>) | 4775 |
| Analysis of the Tumoricidal and Anti-Cachectic Potential of Curcumin. C. OELKRUG, C.M. LANGE, E. WENZEL, S. FRICKE, M. HARTKE, J. SIMASI, A. SCHUBERT (<i>Leipzig, Germany</i>) | 4781 |
| Branched Chain Amino Acid Suppressed Insulin-initiated Proliferation of Human Cancer Cells Through Induction of Autophagy. G.Y. WUBETU, T. UTSUNOMIYA, D. ISHIKAWA, T. IKEMOTO, S. YAMADA, Y. MORINE, S. IWAHASHI, Y. SAITO, Y. ARAKAWA, S. IMURA, H. ARIMOCHI, M. SHIMADA (<i>Tokushima, Japan</i>) | 4789 |
